Xperteam Recruitment team   February 19, 2018

Software/Web Developer Internship

Dear Sir or Madam,

I am seeking a 3-month internship in software and web development and I am extremely interested in the position of Software/Web Developer intern with Xperteam.

I would treasure the opportunity to be able to work at a fast paced company where many different tasks are required for each individual. I do have experience with HTML, CSS and JavaScript through my university training, I have worked on a website project during the first semester of my first year at Polytech Montpellier.

I am a creative, yet focused, student with strong programming skills. My knowledge in algorithms and design patterns has enabled me to implement numerous programs and work on several projects. For example, In my first semester this year, I developed a security system for the museum of Montpellier, Musée Fabre. It is a device made with Raspberry Pi that protects museum objects that visitors are not allowed to touch.

Verbal and written communication are two of my strengths. My strong points are that I speak 4 languages and I can successfully cross cultural lines and challenges in an international work context thanks to my educational background and previous experience that you will find outlined in my resumé.

The programming and planning perspective required for a Software/Web Developer internship align with my abilities and experiences. I am enthusiastic about expanding my knowledge of web development, and embarking on new challenges. In addition, I believe I have a lot to offer Xperteam in terms of programming expertise and I am excited about the prospect of working for you.

Thank you for your consideration. I look forward to meeting you to discuss how I can support the mission of Xperteam.

Sincerely,

Mohamed Iheb FAIZA
